Exposure Category: Moderate DV exposure
Market-Based DV Range: 5% - 10% of pre-loss value
Low Range: \$1,997
High Range: \$3,995
Preliminary Review Position: \$2,996

SCREENING NOTES

This screening uses user-provided pre-loss value, mileage, repair total, damage severity, and known claim indicators. The 17c figure is provided only as a reference calculation and may be lower than market-based diminished value. The market-based range is a preliminary screening position and should be supported with comparable market data when used in a formal claim presentation.

DISCLAIMER

This is a Preliminary Diminished Value Screening only. It is not a certified diminished value appraisal unless reviewed, finalized, and signed by a qualified appraiser. NSPXN does not independently retrieve third-party valuation data; the pre-loss value is based on user-provided information and should be verified against accepted market valuation sources.
